CHIARAVALLI GROUP SpA

MECHANICAL WORM SCREW JACKS

CHIARAVALLI® GROUP SpA

The Chiaravalli group is the technological partner that you should turn to knowing that reliability and respect are values commonly shared.

YOUR IDEAS ALWAYS ON THE MOVE

THE CUSTOMER: ALWAYS AT THE CENTRE OF OUR ATTENTION.

The Chiaravalli group is a dynamic, modern company oriented in fulfilling customers needs and desires.

Human progress has always been based on mechanical application and discovery that stem from human intutition and genius.

Mechanics: the genetic heritage of Chiaravalli Group

The Chiaravalli Group, always aware of the needs of the market has found it necessary to provide its long-standing customers with complete, steady up-dated information about its products 24 hours a day 365 days in a year.

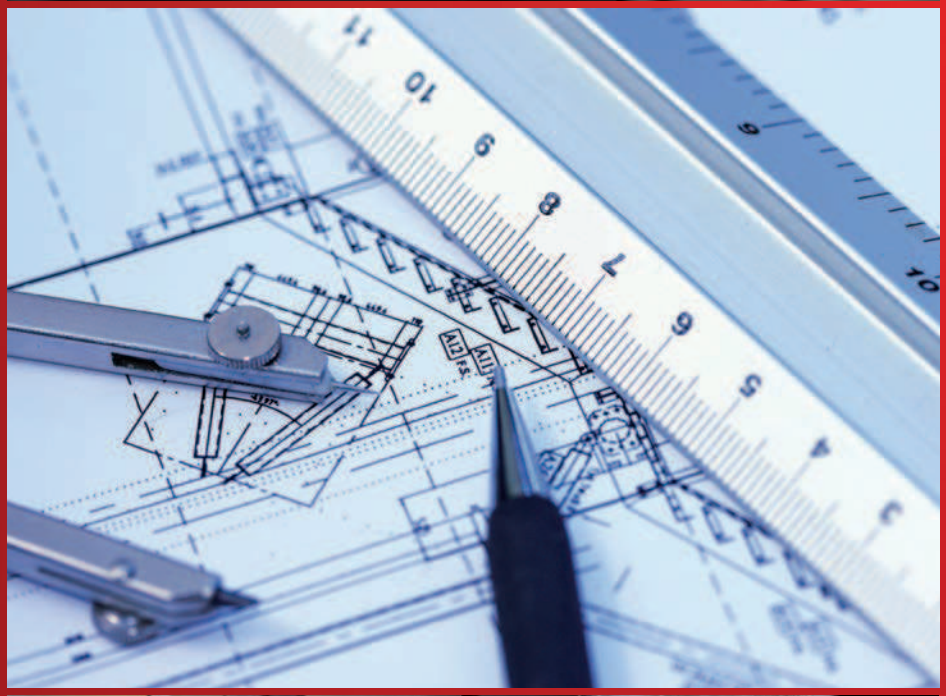
This attention comes from B2B, which is the direct consequence of our interest and dedication to our customers. It is an advanced system of research, purchasing and delivery of all Chiaravalli products. B2B Chiaravalli Group becomes a virtual extension of the customer's warehouse.

RESEARCH

our Group has always been engaged in constant research of brand new products, to be entered into our sales program, together with awareness of the potential benefits of manufacturing long-standing products using new modern materials.

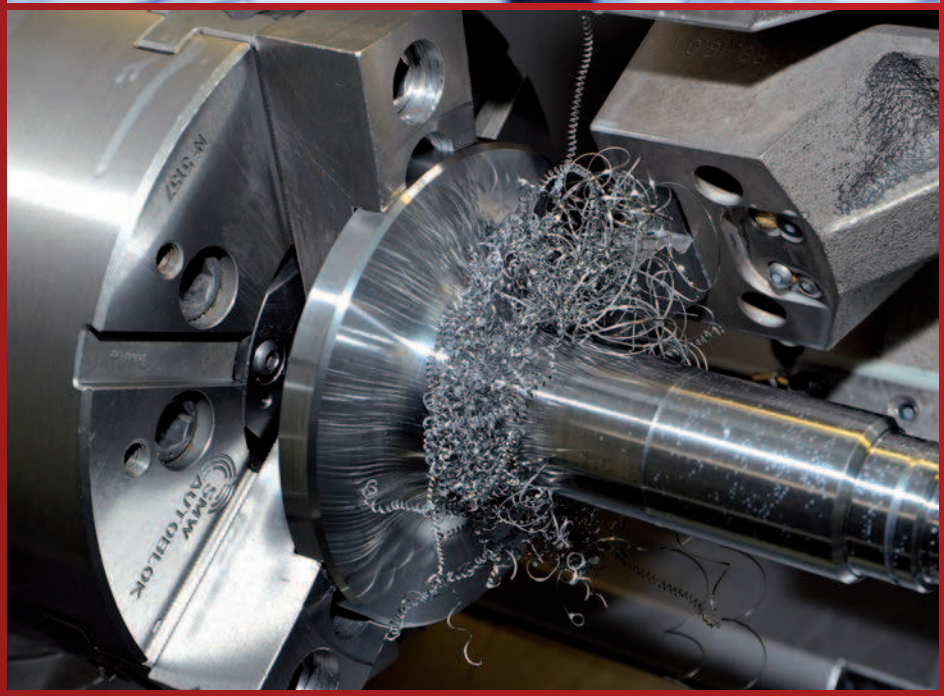
DESIGN

our technical office designs with a CAD System the new products that will contribute to the expansion of the product range offered by Chiaravalli Group SpA, being able to rely on the expertise of highly experienced co-workers.



PROTOTYPING

we have at our disposal a wide range of CNC Machines, and make use of the most advanced CAM techniques, which enable us to produce Prototypes both for our range of products, and also for a large customer base, who rely on our Group with confidence.



PRODUCTION

taking advantage of our modern and large CNC tools fleet, we produce by means of CAD-CAM technology, high precision mechanical components.

QUALITY CERTIFICATION

all our production is controlled step by step during its production cycle. Various measuring rooms, equipped with modern three-dimensional measuring machines, allow a full certification of our products.

LOGISTICS

our logistics, with its excellent organization and interactive database, allows us to make daily shipments in over 52 countries.

SHIPPING SERVICES

we operate in over 52 countries with a large number of national and international forwarders. Our constantly updated information service allows us to track the transport of products to ensure a timely and accurate delivery.

ELECTRICAL

MOTORS AND GEARBOXES

A large range of motors and gearboxes developed by Chiaravalli Group SpA and managed by our Logistics in Cantalupa.

We are able to supply and send any item to catalogue, in over 52 countries, with a minimum lead-time from order receipt.

CHIARAVALLI GROUP SpA

WORM SCREW

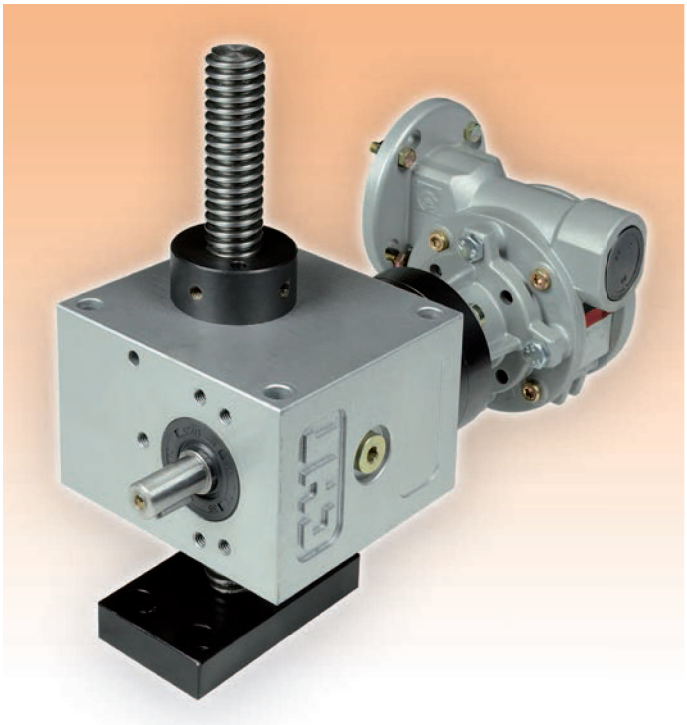
JACKS

The new line of Worm Screw Jacks named CHT (Chiaravalli High Tech) integrates and completes our range of Mechanical Transmission products.

This new line of products is manufactured using high quality materials, manufactured with absolute precision, making use of the modern machinery fleet of the companies belonging to Chiaravalli Group SpA.

The basic elements that make up the final product "Screw Jack" are made in large series, rigorously checked and put in stock. Special virtual software developed by Chiaravalli Group SpA enables our customers to first view the various elements of the required screw jack and then, in the second phase, to order it with absolute precision and confidence.

Chiaravalli Group SpA is engaged to ensure the delivery of this product in very short time, with quality and precision.



CHIARAVALLI GROUP SpA

CHIARAVALLI GROUP SpA

MECHANICAL WORM SCREW JACKS

INDEX

The new series of mechanical screw jack CHIARAVALLI, named CHS, is a product, the innovation of it is due to modularity whitch allowins to supply a customized product in reasonable times.
The coupling with electric motors (either on normal, motor brake or explosion-proof motors) is guaranteed thanks to the predisposition to IEC B5 and B14 flanges.
This type of worm gear screw jack is used in many fields where it is necessary to lift considerable weights, such as automated production lines for sheet metal machinery, packaging, printing, textiles, plastics, food, renewable energy and more.

PRODUCT FEATURES

- modularity
- customization
- high strength cast iron case
- hardened and ground worm gear
- long life lubrication

CHS Series screw jacks are manufactured in 5 sizes, customizable with all the accessories included in the catalogue, according to customers' requirements.

SP SPECIAL FEATURES - DESCRIPTION

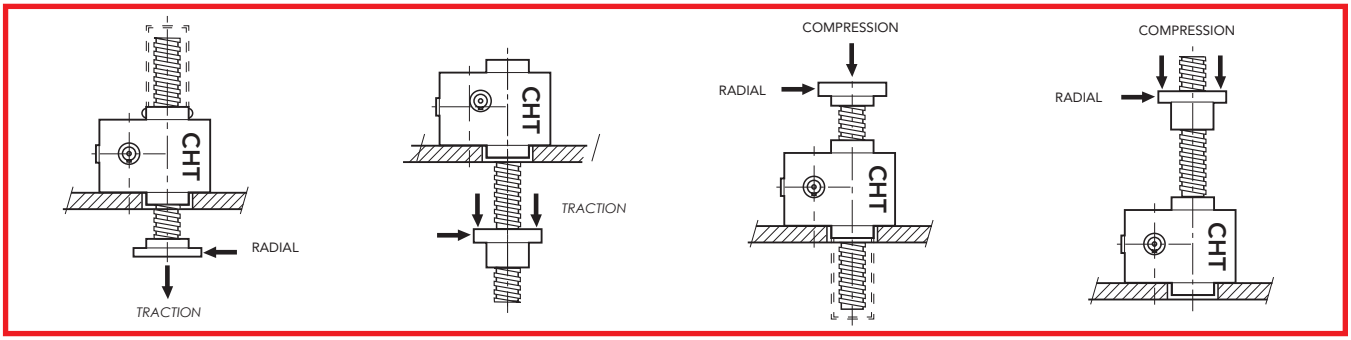
The worm gear based mechanical screw jack is one of the most economical and efficient mechanism for lifting and lowering loads, for push-pull applications. It can be used as a single unit or in multiple combinations, with manual or motorized drive. It is possible to link two or more screw jacks by shafts, couplings and right angle gear boxes, so that all the operations are perfectly syncronized. CHIARAVALLI worm screw jacks are built for nominal loads from 0,5 to 10 tons.

ANALYSIS AND COMPOSITION OF LOAD

For the correct selection of the screw jack and, consequently, for its proper functioning, it is necessary to identify the actual load and the nature of the load, as better specified here below:
- STATIC loads
- DYNAMIC loads

These in turn can be:

- TRACTION loads
- COMPRESSION loads
- RADIAL loads
- COMPOUND loads



DYNAMIC LOADS

TRACTION

The maximum traction load which can be applied to the screw jack, is determined by several factors: heat capacity, temperature, service, impact or radial loads.
Make use of tables on pages. 18 - 48 and page 17

COMPRESSION

The maximum load used in compression is influenced by several factors: length of the threaded shaft, thermal capacity, shock and radial loads, temperature and type of service. Make use of tables on pages 18 - 48
In addition, the load causes a deflection of the same, thus requiring a further examination to be carried out using the table on page 17, according to the Eulero's formula, linked to the type of external guides, so as to determine the maximum load.

RADIAL

In dynamic applications radial loads ARE NOT ALLOWED.

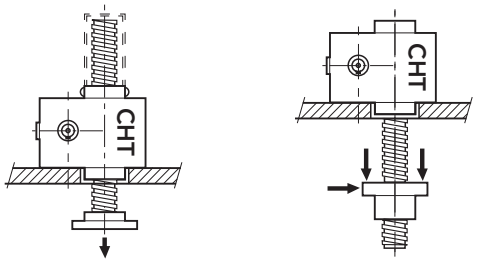
OVERTURNING MOMENT

As well as for radial loads, overturning moment are not allowed: overcome the problem by using appropriate sized external guides, that will avoid to subject the screw jack to such loads.

STATIC LOADS

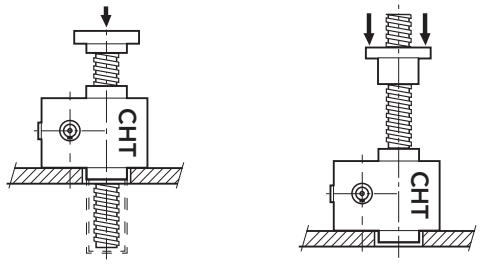
TRACTION

The maximum load in tension applied to the Screw Jack is the max one foreseen by the tables of use on pages 18 - 48



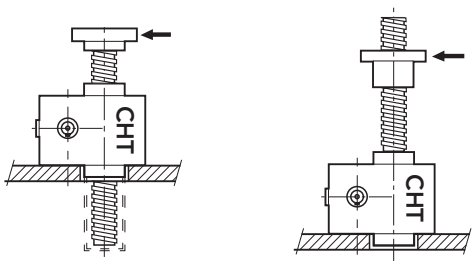
COMPRESSION

The maximum load used in compression is influenced by the length of the threaded shaft, and can be checked in the chart on page 17, according to Eulero's formula, linked in to the type of external guides.



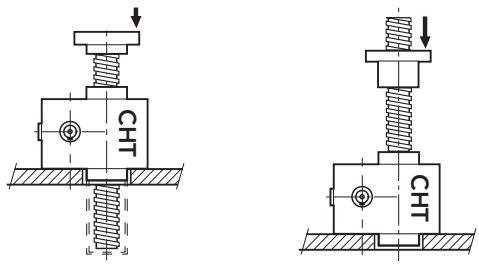
RADIAL

These special loads cause a lateral shift of the shaft, provoking a dangerous deflection which would reduce the capacity of the screw jack. These therefore must be avoided.



OVERTURNINGS LOADS

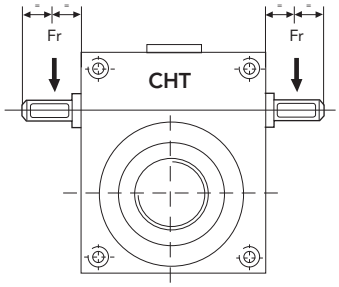
As well as for radial loads, overturning moment are not allowed: overcome the problem by using appropriate sized external guides, that will avoid



WORM SCREW LOAD (INPUT SHAFT)

MAXIMUM RADIAL LOAD (Fr)

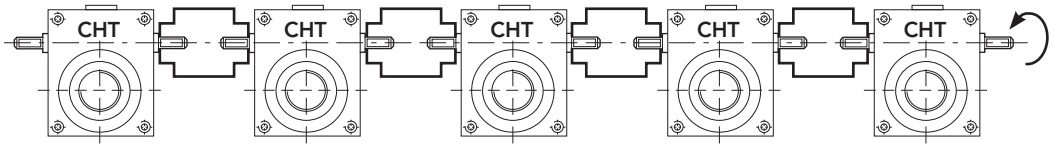
The maximum load on the input shaft of the jack (worm screw) must not exceed the values specified in the table below, measured at half shaft.



SIZE	CHS 1	CHS 2	CHS 3	CHS 4	CHS 5	CHS 6	CHS 7	CHS 8
Fr (daN)	10	22	45	60	60	60	90	90

TORQUE (daNm) (INPUT SHAFT)

For applications with multiple screw jack mounted in series, it is necessary not to exceed the values specified in the table below:



SIZE	CHS 1 MT (daNm)	CHS 2 MT (daNm)	CHS 3 MT (daNm)	CHS 4 MT (daNm)	CHS 5 MT (daNm)	CHS 6 MT (daNm)	CHS 7 MT (daNm)	CHS 8 MT (daNm)
Fast speed (1/5)	2,30	5,40	7,00	49,00	49,00	49,00	80,5	80,5
Fast speed (1/10-1/20)	2,30	5,40	18,50	15,50	13,00	15,30	60,3	60,2
Slow speed (1/30)	-	4,20	15,50	13,00	15,50	13,00	48,2	48,2

VIBRATIONS

CHIARAVALLI jacks, with threaded shafts, are absolutely IRREVERSIBLE, special braking systems to maintain the set positionso are not required.
If they should be subjected to high vibrations, we do suggest to brake the input shaft (for example by using a self-braking electric motor).

MANUAL HANDLING

All CHIARAVALLI screw jacks can be operated manually. The following table shows the maximum load, assuming that a 250 mm diameter wheel is put at input jack to and 5 Kg force is applied to that wheel. Higher loads can be obtained by inserting a CHIARAVALLI gear box between the wheel and the jack or by increasing the wheel diameter.

Max "C" load in daN

SIZE	CHS 1 daN	CHS 2 daN	CHS 3 daN	CHS 4 daN	CHS 5 daN	CHS 6 daN	CHS 7 daN	CHS 8 daN
Fast Speed (1/5)	500	1000	2000	1500	1000	950	900	860
Fast Speed (1/10-1/20)	500	1000	2500	2900	2000	1800	1600	1500
Fast Speed	-	1000	2500	5000	4300	3800	3200	3200

DRIVE BY ELECTRIC MOTOR

CHIARAVALLI series of screw jacks is provided for the connection with electric motors. The tables from pages. 18 to 48 define the engine power and the torque at the start-up of dynamic load, the reduction ratio and the linear speed, related to a use of 30% out of 10 minutes of operation.

MECHANICAL EFFICIENCY

The mechanical efficiency is shown in the table on pages 18 - 48. In the assembly of several jacks, to calculate the total efficiency of the transmission, it should be considered a decrease of 5% performance by each screw jack, for example:
- 2 jacks 95%
- 3 jacks 90% etc.. etc..

HEATING

CHIARAVALLI screw jack, being an IRREVERSIBLE machine, has a relatively low mechanical efficiency, so a certain amount of installed power will turn into heat, bringing the jack, if used correctly, to a maximum temperature of 80 ° C.

LOAD

From the tables on pages 18 - 48 you can detect the maximum loads for each screw jack not to be exceeded. To select the jack, it is necessary to apply also the coefficients stated below, relating to temperature and duty cycle. If different from the calculation conditions, they can change the actual load. Also check the maximum buckling load from the table on page 17, which changes according to the length of the lifting screw.

OPERATING TEMPERATURE

All data mentioned in this catalogue refer to a room temperature of 20° C. For different room temperatures it is necessary to derive the correction "x" factor from the table here below. For the JACK CORRECT CAPACITY, multiply the jack load capacity by then "x" factor.

ROOM TEMPERATURE	10°	20°	30°	40°	50°	60°	70°	80°
"X" Factor	1,25	1	0,8	0,7	0,5	0,3	0,2	0,1

OPERATION - SERVICE FACTOR

The tables on pages 22 - 36 refer to a service of 30% in 10 minutes and at a room temperature of 20° C. For different services, it is necessary to find the "SF" Service Factor relating to the service required by consulting the chart here below and multiplying the dynamic load factor such factor.

% OUT OF 10 MINUTES	30%	40%	50%	60%	70%	80%	90%	100%
"SF" Factor	1	1,1	1,3	1,6	2	2,5	3	5

POWER AND INPUT TORQUE

See the tables from page 18 to page 48: for the boxes with a light blue background consult our technical department.

LUBRICATION

CHIARAVALLI screw jacks are lubricated with a long life lithium soap grease AGIP GR MU EP2 and fitted with grease lubricator, for subsequent operations.

LUBRICATION INTERVALS:

normal working conditions: once a month
heavy work conditions: once a week
continuous working conditions: foresee lubrication system.

LUBRICATION OIL (OPTIONAL)

On request, it is possible to have oil lubrication.
Here below the recommended types of oil:

MOBIL	GEAR 630
SHELL	OMALA 220
IP	MELLANA 220

LUBRIFICATION LIFTING SCREW

A correct life of CHIARAVALLI screw jack also depends on the lifting screw good lubrication, which must be carried out not later than approximately 500 hours of normal working. Heavy duty or special environmental conditions reduce this lubrication interval.
The recommended lubricants for this operation are:
TOTAL CERAN WR2 - BECHEM-RHUS BERUTOX M 21 KN

USE ISTRUCTION

STROKE - 2000 mm maximum standard stroke
Longer strokes are made on request.
SPEED' - the linear speed that can be used by screw jacks depends on several factors:
TYPE OF SCREW JACK and transmission ratio
THERMAL CAPACITY
DYNAMIC LOAD
ROOM TEMPERATURE
SERVICE
The tables on pages 18 - 48 define, according to the load, the power required torque and the speed limit.

CRITICAL COMPRESSION LOAD

OVERSIZE SCREW - AM

RS execution only - Rotating screw

For all sizes it is possible to fix screws with oversize diameter and pitch.
For TS execution translating screw, please consult our Technical office.

RG - SLACKS RECOVERY

The functioning is based on the role of nuts against nuts. In the TS case, the regulation on the jacks cover allows the slacks recovery.
In the RS case, it occurs by means of the counter-nut tightening to the nut.

CU - WEAR AND TEAR CONTROL

The application of an additional nut, just constrained to the helical wheel rotation (in the TS case) and to the female screw (in the RS case), without being subject to the load, allow to visually check the screw-jack wear.

SCREW JACK WITH TRAVERSING SCREW, RIGID PROTECTION, CONTROL STOKE END AND FLEXIBLE PROTECTION

Many applications need the certainty that the screw-jack can bear the loading also when the nut (meant as worm wheel or nut) is worn out.
The safety nut couples to the main nut with a frontal key clutch.
In case of the main nut wear, the distance between the two nuts decreases.
This wear causes the reduction of the L or L1 dimension (it depends on the model type, i.e. TS or RS type).
When such a decreasing reaches a a value, stated in the table, it is strictly necessary to replace the main and the safety nuts: **therefore, this value is to be periodically checked.**
Please also take into account that the safety nut works only in one direction (so either by traction or by compression).

PRIORITY TRACK SERVICE

GENERAL SALES CONDITIONS

1) ORDERS - Orders for special and standard material must always refer to offers made by CHIARAVALLI GROUP SpA.
The orders are binding for the client. Once work has commenced no cancellations or order reductions will be accepted unless the client reimburses the costs of the material and the work carried out up to the moment in which the order was suspended.
The quantity despatched can vary by ± 5% compared to the quantity ordered.

2) PRICES - The prices are those in force at the date of order.
All prices are for goods delivered ex-works Premezzo, packing excluded. If there should be any increase in production and material costs over the duration of the supply, CHIARAVALLI GROUP SpA reserves the right to adapt the prices accordingly, even for orders in course.

3) TERMS OF DELIVERY - Only the terms of delivery indicated by CHIARAVALLI SpA are to be considered valid. However, they must only be considered as indicative. In the event of difficulty in the procurement of materials, strikes or in any event in all cases of force majeure, the terms of delivery will be automatically extended without CHIARAVALLI GROUP SpA having to pay any reimbursement for damages. The client is obligated to collect special material ordered when ready.

4) DELIVERIES - Deliveries are the responsibility of the purchaser and are carried out at his own risk and peril.
Any claims for shortages must be presented within 8 days of receipt of the goods. If it is agreed that the cost of transport is to be paid, even if only in part, by CHIARAVALLI GROUP SpA, the latter reserves the right to choose the most economical means of transport.

5) PACKING - Packing will be invoiced at cost.

6) RETURNS - No returns for any reason will be accepted unless previously authorised and with packing, any customs clearance and the return paid for by the purchaser. To cover warehouse and administrative expenses a debit note will be issued for approx. 15% of the value of the goods returned.

7) WARRANTY - CHIARAVALLI GROUP SpA promises to repair or substitute free of charge any parts that they recognise as being defective. The questioned goods must be returned to the factory of CHIARAVALLI GROUP SpA, free of all expenses. The warranty will be considered cancelled in the event that the parts returned as defective have been repaired or tampered with. The repair of defective parts carried out by the purchaser will only be accepted after authorisation from CHIARAVALLI GROUP SpA and after their approval of the cost estimate.
CHIARAVALLI GROUP SpA does not accept responsibility or pay any reimbursement for damages that occur during the use of their products, even if defective. Warranty is excluded for leakage of lubricant caused by normal wear of the oil seals.

8) RESPONSIBILITY - CHIARAVALLI GROUP SpA does not accept responsibility or pay any reimbursement for damages that occur during the use of their products, even if defective.
CHIARAVALLI GROUP SpA declines all responsibility in the execution of parts to a client's design under any patents.

9) PAYMENTS - Only payments carried out in the manner and terms agreed will be considered valid. Once the due date of payment has passed, CHIARAVALLI GROUP SpA will calculate the interest on delayed payment at a rate that is 3% higher than the legal one, retaining the right to demand payment.
In the event of delayed or missing payment by the purchaser, the company CHIARAVALLI GROUP SpA reserves the right to suspend deliveries of the orders in course or to demand advance payment without having to pay any reimbursement or compensation to the purchaser. Any dispute regarding materials in manufacture or already possessed by the purchaser does not free the latter from the commitment of making the payment by the agreed date and for the whole amount of the invoice without making any deductions.

10) OWNERSHIP - All of the goods despatched remain the property of CHIARAVALLI GROUP SpA until the invoice is fully paid.

11) COMPETENT COURT - Any controversy concerning business relations with CHIARAVALLI GROUP SpA will be dealt with under the jurisdiction of the Court of Busto Arsizio.
